

# Karbon<sup>®</sup> ID&V

Your **secure** digital identity verification solution.

Elevate Your **User Enrolment, Authentication and ID Verification** processes.

## PRODUCT FEATURES

### GLOBAL DOCUMENT COVERAGE

Supports the processing of more than 10,000 ID and non-ID documents for over 150 countries worldwide.

### ALL-ROUND BIOMETRICS

Advanced liveness check, optimised to match between scanned identity documents and captured selfies.

### DOCUMENT OCR

Fast and accurate data extraction from ID documents, including automated checks for card position, size, quality, customizable language.

### ANTI-FAKE INJECTION

Direct access to the mobile hardware, blocks the potential for the injection of a fake image of an ID or the use of an AI Deepfake for biometric checks.

### DOCUMENT AUTHENTICATION

Validates security features including, holograms, watermarks and MRZ codes. Can be connected to national, public, private databases for additional validation checks.

### ENHANCED SECURITY AND PRIVACY

Enhanced methods for encrypting, fragmenting and storing biometric data, eliminating the risk of data breaches and protecting data privacy.

**99%**

Liveness and  
Biometric Matching  
Success Rate

**91% - 93%**

ID Verification and  
OCR Success Rate

**>75%**

Client Penetration  
and Digital  
Engagement Rate

**80+ Clients**

Globally including  
governments and major  
financial institutions

## PRODUCT BENEFITS

Utilise **AI and machine learning** to detect and prevent fraudulent identities in **real-time**.

Ensure top level **security** of biometric data through use of **fragmentation and image sharing**.

**OCR Identify information** direct from the Identity Documents

**Analyse and report** on Client Penetration and Automated Control Success Rates
